Get each day 2 rounds of 16 questions : an easy round and a hard one, **you have to play both.**

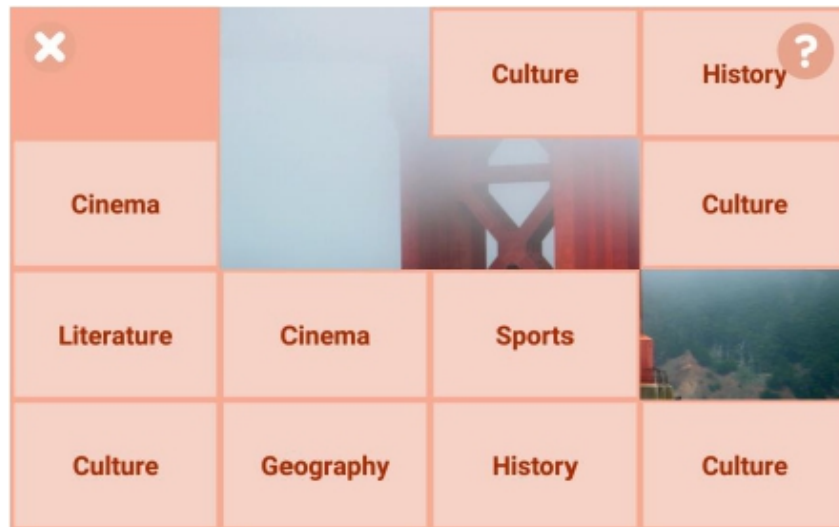

On the left column : the day when rounds are unlocked.

On the right column : the number of right answers you have given.

It is possible to go back to a previous day round, but not to play in advance.

If you leave a questions round without finishing it, you can go back to it later.

Round of Questions

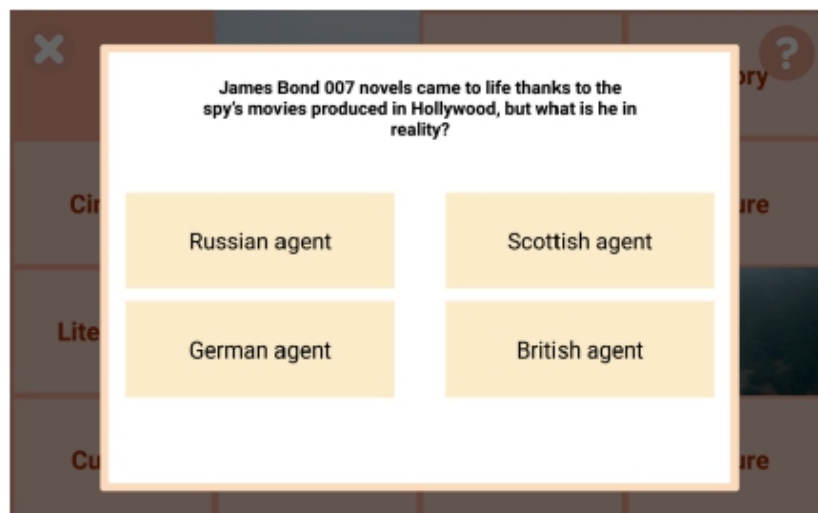

Here is the screen you get by touching on a round of questions (easy and hard).

You just have to touch a box with the theme you prefer to get the question.

In case of right answer : a part of the hidden picture appears in place of the touched box.

In case of wrong answer : a blank box appears (upper left corner on the screenshot).

Example of question

You have to touch the chosen answer.
